New York, April 71.—The European war situation continues to largely dominate the course of the market for stock here, as was shown by the quick adjustment to the London parity in the quicking and the course of the market for stock here, as was shown by the quick adjustment to the London parity in the quicking and the course of the market for stock here, as was shown by the quick adjustment to the London parity in the quicking and the course of the market for stock here, as was shown by the quick adjustment to the London parity in the quickings at the opening. The day was without special developments otherwise, outside of special movements in individual stocks. London showed a further fractional advance for Ameriindividual stocks. London showed a further fractional advance for American securities, and this was probably due, in part, to the fact that yesterday's London prices were somewhat depressed by the excessive depression existing in New York on Monday. Prices for Americans continued to improve in London during the day, and there was some buying for London account here. The resurt has been that prices have recovered the loss sustained on Monday, and are very generally above Saturday's close, to the extent of a varying fraction. Trading was dull today, however, outside of some special cases, dealers having apparently been convinced by the experience of Monday, when they acted without any foreign exchanges to take their cue from, and largely oversold the market on the war news, that they did not understand much about the eastern question and that they would nrefer to await the clearer comprehension before buying or selling further.

A notable point in the day's market for stocks was that it moved with the wheat market, though within a narrower range. This was contrary to the tendency hitherto shown ever since the beginning of the present war scare, and was, perhaps, due in part to the influence of domestic crop conditions on the wheat market. The day's gains in the rallway list generally were confined to fractions. In the coalests, some larger gains were noticed, due in seme measure to maniguiation to plinch the shares but influenced also by reports of plans for more economical marketing of the coal output. In the grangers Burlington crossed St. Paul and ruled a fraction higher during the day. Sugar stained by on published reports of steps being taken to secure control of the beet sugar output.

The bond market ruled firm and higher, with a lack of feature in the best sugar output.

very change. At the present time the entire face of the tunnel—top, bottom and sides—are in mineral, and the present indications are that the Jay Bird in in a large body of gold ore.

While the ore body has not yet been fully proved up, mining men regard the strike as one of great importance. It is probable that the mineral is in one of the veins so frequently found in the pyrifferous porphyry, and which are often very rich and valuable. The developments on this property will be watched with the greatest interest by mining men, and the opening up of the Jay Bird into a producer will lead to considerable work in that portion of California guich.

Dr. Crook was receiving many congratulations on his good fortune yesterda;

Mammoth Record Notes. A lot of Northern Spy ore is now on the dump and will soon be marketed.

Work is to be resumed next Tuesday at the Sunbeam, and the shaft will be

ligure in mining operations in the The Minor says:

Joseph Hebaus of this city has perfected an electro-chemical process for the extraction of the precious metal from low grade ores which bids fair to revolutionize the mining industry. The process has passed beyond the experimental stage, and patents are now pending.

"With my process from 4 to 5 ounces of gold or silver can be extracted from for a large percentage of the silver, but he says that nothing can be stated definitely until a clean-up is made, definitely until a clean-up is made.

The officers of the company have always been sanguine as to the outcome of the enterprise, and never for a moment have they doubted but that the property would eventually come to the front as a regular dividend-payer. This increasion is also growing with outsiders, which fact is verified by the carnest demand for the stock op the floor of the Exchange yesterday.

Activity at Albion. Times, Albion, Ida.: Mr. M. F. Durfee has bonded the Hawkins mine, owned by H. D. Durfee and James Durfee, Con-
